

G. Croenen

Dertig nieuwe Middelnederlandse teksten uit de dertiende eeuw

Summary

This article is an addition to the first part of the Corpus of Middle-Dutch texts published in 1977 by M. Gysseling. It consists of a diplomatic edition of 30 new Middle-Dutch texts from the 13th century. While some of the texts edited here were known to Gysseling but could not be consulted by him at the time, most of them were not. Their omission can be explained mainly by the way Gysseling carried out the archival research for his *Corpus*, browsing through chronologically ordered charter-collections from corporations and institutions located in Dutch-speaking areas.
