

G. Will

## *Ben en zijn* in de dialecten van Zeeuws-Vlaanderen

### **Summary**

Blancquaert's dialectatlases show that in Zeeuws-Vlaanderen both *zijn*-forms and *ben*-forms occur in the paradigm of *zijn*. From the analysis of the spoken dialect it appears that this picture is on the whole correct, and that particularly in subordinate clauses the preference for *zijn* is to be found in the whole paradigm.
